**ADDENDUM #1**

Q: 1. Are there stumps for grinding located at various locations? Or 2. Is it just chipping that needs to be done of debris that has been collected to a centralized location?

There are no in-ground stumps included as part of this bid, however, already-removed stumps and logs up to 24" in diameter (and possibly bigger) may be part of the debris that is collected and needs to be ground. The bulk of the work will be performed at the Recycling Center located at the Public Works Complex though there may be ancillary locations in Randolph where the same work may need to be performed in the event of a natural disaster.
