Randolph Township Park, Recreation & Community Services

2020 Day Camp Protocols

- All facilities will be open to the camp. Playgrounds and tent/pavilion areas will be disinfected each day before and after the camp day.

- Each group will be assigned to a specific area under a tent/pavilion. These areas will not be shared with other groups. Tables will be disinfected before and after camp daily.

- Each group will be supplied with hand sanitizer that will be available throughout the day. In addition, to supplement the soap and water in the bathrooms, extra hand washing stations will be located around the park.

- Individual groups will be supplied with individual equipment bags. No equipment will be shared between groups until it has been disinfected.

- Equipment storage and refrigeration units will be disinfected daily.

- No group trips for the 2020 camp season.

- Staff will be supplied with face coverings which must be worn upon arriving at camp through attendance. It is strongly recommended that campers also wear facemasks during this time. Face coverings should be worn when feasible.

- All staff and campers will have their temperature taken each morning. Staff will have their temp taken and recorded upon reporting each morning. Campers will have their temps taken prior to activity starting for the day. Any staff or camper with a fever of 100.4 or higher will not be permitted to stay at camp.

- In the event of severe inclement weather, camp will be canceled for the day. Parents will be notified via REMIND the night before a forecasted storm. If unexpected weather rolls in, campers will seek covering in their designated area under a tent/pavilion. *If enough indoor spaces become available for rain days, so that we can still run camp on those days, we will announce those details at that time.
